

The Growing Edge FTP site

File Transfer Protocol (FTP) is a much more efficient way of electronically transmitting large files. It does not have a transfer size limit unlike most e-mail systems.

- Obtain an FTP program. (There are many available for every major platform from software sites like Download.com.)
- Use the following information to connect your FTP program to our upload site:

Address: ftp.growingedge.com
Username: anonymous
Password: <put your e-mail address here>

- Change to the directory "incoming"
- Upload your file

That is it. If you have problems, please consult your FTP program's documentation first before contacting us at web@growingedge.com or (541) 757-8477.
